## SPECIALISED SKIN TREATMENTS

### **MICRODERMABRASION**

Microdermabrasion is a fabulous method of exfoliating dead and thickened skin cells from the surface of your skin, revealing fresh new cells that give you the appearance of a younger, smoother looking skin.

This is achieved by abrading (blasting) the surface of the skin with very fine alum oxide crystals.

There are two immediate benefits:

Even from the first treatment you will notice a much smoother texture to your skin as dead skin and debris have been removed.

Secondly, is that the stimulation of the dermis of your skin promotes the production of collagen and elastin resulting in healthy new skin.

This exciting, instant skin revival system is ideal for the treatment of pigmentation, age spots, acne, acne scarring, dull congested and thickened skin, scar tissue, sun damage and aged skin as well as fine lines and wrinkles.

For maximum results a course is recommended.

From **\$110.00 per treatment**

### **PARAMEDICAL PROCEDURES**
